PROFESSIONAL SUMMARY

AI engineer with 1.5 years across three roles building LLM agents, AI voice agents and the data pipelines that feed them, mainly in Python on AWS. Chooses models by measuring them: benchmarked four OCR engines to find one that runs inside AWS Lambda, and re-tuned a sales voice agent to lift live transfers 12%. Targeting AI engineering roles that put LLM systems into production.

WORK EXPERIENCE

DevOps Engineer | InnovyQ Solutions, Bengaluru *Jun 2026 – Sep 2026*

- Set up the first two tiers of Project IVY, a Slack support agent on AWS that escalates from FAQ answers (L1) to company documents (L2), an LLM fallback (L3) and a human Jira ticket (L4). Converted the company's Excel FAQ sheet into **21 Amazon Lex V2 intents**, and built the frontend of the onboarding portal where companies connect the documents a Bedrock knowledge base (RAG) answers from.
- Benchmarked four OCR engines on hand-transcribed ticket screenshots so the agent could read pasted errors. Mistral OCR was the most accurate (100% at 823 ms), but shipped **PaddleOCR (98.9%)** because it runs inside AWS Lambda. Wrote a race-free live-agent dispatcher that assigns tickets to the least-loaded on-shift agent through conditional DynamoDB writes.

Software Engineer | Artenos Network, Bengaluru *Jul 2025 – May 2026*

- Designed CRM dashboards in Python and Matplotlib that became the sales team's daily reporting, cutting decision time by **about 25%**.
- Ran LLM benchmarking and iterative prompt testing, raising measured response accuracy by **about 15%**.
- Shipped internal full-stack tools in React Native, Next.js and TypeScript over Python REST APIs, deployed on Vercel.

AI Specialist | Sygnius Digital, Noida *Jan 2025 – Jun 2025*

- Wrote a configurable lead pipeline in Python. The Google Maps Places API finds businesses for any search query, and Selenium and BeautifulSoup scrape their websites for the phone numbers and contacts their listings leave out. It produced **600+ qualified leads**.
- Deployed Bland AI and Retell AI voice agents to call those leads, with voicemail/IVR detection and live transfer to sales. Re-tuning the agent's tone lifted successful transfers by **12%**, on calls with a 65% answer rate.
- Configured SPF, DKIM, DMARC and domain warm-up (Instantly.ai, Woodpecker) for client email campaigns, tracked in Google Postmaster Tools and Looker Studio. Prototyped an email generator by fine-tuning FLAN-T5 and DistilGPT2.

PROJECTS

Quantamental-Screener | *Python, Pandas, Streamlit, Plotly, yfinance, Redis, Docker* | Link

- Built a four-factor equity model (momentum, volume, volatility, news sentiment) ranked daily, with a weekly-rebalance backtest: Sharpe 1.20, -10.07% max drawdown.

Phase-Contrast Clean-Up Pipeline | *Python, PyTorch, OpenCV, scikit-image, Gradio* | Link

- Removed halo artifacts from microscopy images with difference-of-Gaussians, CLAHE and a residual U-Net, raising mean PSNR from 12.87 to 20.62 dB and SSIM from 0.206 to 0.360.

Arteza (client work) | *React, TypeScript, Vite, Tailwind, Supabase, Vercel* | Link

- Designed and built a live gallery and storefront for an art studio: 106 paintings, a style quiz, class booking and WhatsApp checkout.

TECHNICAL SKILLS

- **Languages:** Python, SQL, TypeScript, JavaScript
- **AI / LLM:** LLM agents, RAG, prompt engineering, LLM benchmarking, Hugging Face Transformers (FLAN-T5, DistilGPT2), Bland AI, Retell AI, OCR (PaddleOCR, Mistral)
- **ML & Data:** PyTorch, scikit-learn, OpenCV, Pandas, NumPy, Matplotlib, Plotly, Streamlit, Power BI
- **Cloud & DevOps:** AWS (Lambda, SQS, DynamoDB, Cognito, Lex, Bedrock), Google Cloud, Docker, Git, Vercel
- **Web:** Next.js, React, React Native, Vite, Tailwind, Supabase, REST APIs, OAuth 2.0
- **Automation & Outreach:** Google Maps Places API, Selenium, BeautifulSoup, Instantly.ai, Woodpecker, Email Deliverability (SPF, DKIM, DMARC)

EDUCATION

Symbiosis Institute of Technology, Pune | *Jun 2021 – Jun 2025*

B.Tech, Robotics & Automation

CERTIFICATIONS

- STAT110x: Introduction to Probability | HarvardX | March 2023 | View Certificate
- AI Literacy | IBM SkillsBuild | June 2026 | View Certificate
