PROFESSIONAL SUMMARY

Detail-oriented professional with a B.Tech in Robotics and Automation and experience as an AI Specialist Intern. Skilled in Python, data analysis, and leveraging AI tools to automate processes and generate insights. Seeking a role as a Data Analyst or AI Specialist where I can apply my technical and analytical skills to solve business problems.

EDUCATION

Symbiosis Institute of Technology
B.Tech., (Robotics & Automation)

Pune, Maharashtra
Jun 2021 - Jun 2025

Relevant Coursework: Artificial Intelligence & Machine Learning, Statistics & Numerical Methods, Database Management & Warehousing, Data Visualization, Computer Vision for Robotics, Path Planning & Reinforcement Learning, Blockchain Technology for Robotics, IOT and Cloud Computing, Introduction to Deep Learning

PROFESSIONAL EXPERIENCE

Software Engineer | Artenos Network Pvt Ltd

July 2025 - Present

- Develop and maintain interactive dashboards from CRM data, enabling real-time business intelligence and **improving decision-making efficiency by 25%**
- Implement LLM inference pipelines and conduct comprehensive benchmarking, achieving **15% improvement in model response accuracy** through iterative prompt testing
- Build and deploy full-stack applications using React Native, Next.js, and TypeScript, with backend REST APIs in Python hosted on Vercel

AI Specialist | Sygnius Digital, Noida

January 2025 - June 2025

- Automated the lead generation pipeline by developing a system to scrape data from Google Maps, compile reports via API, and initiate AI-driven cold calls, **reducing manual effort by 40%**.
- Implemented an AI calling agent to automate lead follow-ups within the CRM, **reducing the sales team's manual call time by 40%** and enabling them to handle a higher volume of leads.
- Analyzed sales performance data using Python and SQL, identifying that AI-driven calls within one hour of lead generation had a 3x higher conversion rate; implementing this **increased overall lead conversion by 15%**.

PROJECTS

Quantamental-Screener | Python, Yahoo Finance API, NewsAPI, Scikit-learn, Streamlit

- Developed an AI-powered stock screener that blends technical analysis (momentum, volume, volatility) with real-time news sentiment scoring.
- Engineered a ranking algorithm to evaluate equities based on multiple factors, providing a quantifiable investment score.
- Built an interactive dashboard using Streamlit for visualizing stock performance and model rankings.

Intelligent Spectroscopy Prototype for Coconut Spoilage Detection | Python, Spectroscopy Data, Scikit-learn, Computer Vision

- Developed a non-destructive quality detection system using spectral analysis and machine learning to identify early-stage spoilage in coconuts.
- Processed and analyzed spectroscopy data to identify key biomarkers of spoilage, achieving over 90% accuracy in classification.

Wikipedia Summarizer | Python, NLTK, Transformers Library, ROUGE

- Built an NLP tool to generate concise summaries of long Wikipedia articles.
- Addressed challenges in long-text context preservation & evaluated summary quality using ROUGE metrics.

Yosemite Image Translation GAN | Python, TensorFlow/Keras, PIL, NumPy

- Implemented a Generative Adversarial Network (GAN) to learn mappings between different artistic styles of landscape images.

TECHNICAL SKILLS

- Programming:** Python (Proficient), SQL
- Machine Learning & AI:** Scikit-learn, TensorFlow, PyTorch, NLP (Sentiment Analysis), GANs, AI Agent Integration, Time-Series Forecasting
- Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Plotly, Dashboard Creation (Google Colab, Streamlit), Power BI
- Tools & Platforms:** Git, Google APIs, Azure, Google Colab, MS Office, Google Workspace, Framer, Canva
- Other:** Web Scraping (BeautifulSoup, Selenium), API Integration, Technical Writing, Process Automation

CERTIFICATIONS

- Microsoft Azure AI Fundamentals (AI Overview, NLP, Computer Vision), Microsoft Learn, **06/2024**
- Python for Computer Vision with OpenCV and Deep Learning, Udemy, **08/2023**
- Introduction to RPA and Automation, UiPath, **09/2021**
