PROFESSIONAL SUMMARY

AI engineer with 1.5 years building LLM agents and the AWS infrastructure behind them. Shipped Project IVY, a Slack support agent that answers through Lex V2 intents, a Bedrock RAG knowledge base and a Claude fallback before filing its own Jira tickets, and AI voice agents that held conversations on 65% of outbound sales calls. Python, AWS, PyTorch, SQL. Looking to ship LLM features used by real people.

WORK EXPERIENCE

DevOps Engineer | InnovyQ Solutions, Bengaluru *Jun 2026 - Sep 2026*

- Built **Project IVY**, a Slack support agent on AWS that answers in four tiers: **L1** FAQ answers through **Lex V2**, **L2** answers from company documents through a **Bedrock knowledge base** (RAG), **L3** an LLM fallback (Claude on Bedrock), and **L4** escalation to a human as a **Jira** ticket. Owned L1 and L2: wrote the importer that turns a company's Excel FAQ sheet into **21 Lex intents**, and built the onboarding portal where companies connect and upload the documents L2 answers from.
- Benchmarked four OCR engines. **Mistral** was the most accurate (100% at 823 ms); I shipped **PaddleOCR** (98.9%) because it fits inside Lambda. Wrote a race-free live-agent dispatcher that assigns tickets to the least-loaded on-shift agent using conditional DynamoDB writes.

Software Engineer | Artenos Network Pvt Ltd *July 2025 - May 2026*

- Built CRM dashboards in Python and Matplotlib that cut the team's decision time by about 25%, and ran LLM benchmarking and prompt testing that raised response accuracy by about 15%.
- Built internal full-stack tools in React Native, Next.js and TypeScript over Python REST APIs, deployed on Vercel.

AI Specialist | Sygnius Digital, Noida *January 2025 - June 2025*

- Built a configurable lead pipeline in Python: the **Google Maps Places API** finds businesses for any search query, and **Selenium** and **BeautifulSoup** scrape their websites for the phone numbers and contacts their listings leave out, producing **600+ qualified leads**. Deployed **Bland AI** and **Retell AI** voice agents to call them, with voicemail/IVR detection and live transfer to sales: **65% of calls** were answered and held a conversation, and tuning the agent's tone lifted transfers by **12%**.
- Set up email outreach for client campaigns: **SPF, DKIM and DMARC** authentication, domain warm-up through **Instantly.ai** and **Woodpecker**, and deliverability tracking in Google Postmaster Tools and a Looker Studio dashboard. Prototyped a personalized email generator by fine-tuning **FLAN-T5** and **DistilGPT2**.

PROJECTS

Quantamental-Screener | *Python, Pandas, Streamlit, Plotly, yfinance, Redis, Docker* | Link

- Four-factor model (momentum, volume, volatility, news sentiment) blended into one daily rank, with a weekly-rebalance backtest: Sharpe 1.20, −10.07% max drawdown.

Phase-Contrast Clean-Up Pipeline | *Python, PyTorch, OpenCV, scikit-image, Gradio* | Link

- Removes halo artifacts from microscopy images with difference-of-Gaussians + CLAHE and a residual U-Net: mean PSNR 12.87 → 20.62 dB, SSIM 0.206 → 0.360.

Arteza (client work) | *React, TypeScript, Vite, Tailwind, Supabase, Vercel* | Link

- Designed and built a live gallery and storefront for an art studio: 106 paintings, a style quiz, class booking and WhatsApp checkout.

TECHNICAL SKILLS

- **Languages:** Python, SQL, TypeScript, JavaScript, Java, C++
- **AI / LLM:** Prompt engineering, RAG, LLM benchmarking, Lex V2, Bedrock (Claude), Gemini, Bland AI, OCR
- **ML & Data:** PyTorch, scikit-learn, OpenCV, Pandas, NumPy, Matplotlib, Plotly, Streamlit, Power BI
- **Cloud & DevOps:** AWS (Lambda, SQS, DynamoDB, Cognito, Aurora), Google Cloud, Docker, Git, Vercel
- **Web:** Next.js, React, React Native, Tailwind, Supabase, REST APIs, OAuth 2.0
- **Automation:** BeautifulSoup, Selenium, Twilio, Klaviyo, email deliverability (SPF, DKIM, DMARC)

EDUCATION

Symbiosis Institute of Technology **Pune, Maharashtra**

B.Tech (*Robotics & Automation*) *Jun 2021 - Jun 2025*

Relevant Coursework: Machine Learning, Deep Learning, Computer Vision, Statistics, Databases, Cloud Computing
